NOTICE OF SCHOLARSHIP AVAILABILITY – 2017

Nursing Scholarship Program

During the past six (6) years, the Advanced Homecare Institute of Montana (AHIM) has awarded almost \$70,000 in scholarships. These scholarships are awarded to Montana students who have an expressed interest in Nursing and who also have an expressed interest in studying, living, and working here in our great state.

The Advanced Homecare Institute has the goal of increasing interest in the field of Home Health Care, which is desperately needed in Montana. To promote that increasing interest in Home Health Care, the Advanced Homecare Institute awards Nursing Scholarships of up to \$1,500.

Students receiving these awards are those who maintain high academic standards as well as; have and express an interest in pursuing a Nursing career, will be attending a Montana school of higher education, and have an expressed interest in living and working in Montana.

During the past six (6) years, school professionals like you have helped to identify students who fit these criteria. In addition, you have helped us by not only referring students who have an expressed interest in Montana and Home Health Care, but who also have demonstrated experience in working as a caregiver either through employment or by caring for a family member. We would consider applications from these kinds of students as *especially appropriate* for our scholarship awards.

Also, because of our affiliation with Home Care Services, which has 10 Home Care offices around the state, we are also very interested in students from rural Montana communities.

Our Nursing Scholarship application process can be found online at advancedhomecaremt.org.

We are most appreciative of any support and student referrals you may provide.

Thanks!

Rosemarie Jones, Executive Director
Nursing Scholarship Committee
