SCHOOL OF MINES AND ENGINEERING

## ENVIRONMENTAL ENGINEERING AT MONTANA TECH

Environmental engineers develop solutions to today's most pressing environmental issues by applying the principles of engineering and science. The ABET-accredited Environmental Engineering Program at Montana Tech is one of the most established independent programs in the nation. Our students work in a collaborative setting that champions and fosters innovation. Students gain a broad-based science and engineering education integrated with advanced courses, including air and water pollution control, hazardous waste management, stream restoration, pollution prevention, environmental risk issues, energy and sustainability, land and stream remediation and reclamation. The demand for environmental engineers significantly increased over the past years, and job opportunities are great with 95-100% current placement. Some graduates also pursue a Master's degree in the department or seek admission into Master's and Doctoral programs at other universities.

## WHERE ARE WE LOCATED?

### ADMISSION REQUIREMENTS

#### Montana Tech Bachelor's Program

##### First Time Freshmen

- Earn a minimum cumulative high school GPA of 2.5 or
- Rank in the top half of your high schools graduating class, or
- Earn a minimum ACT composite score of 22 or SAT total score of 1120

##### Transfer Students

- Minimum cumulative college GPA of 2.0

### BECOME AN OREDIGGER!

The application is easy and free!

### PROGRAMS IN THE SCHOOL OF MINES & ENGINEERING

- Civil Engineering
- Computer Science
- Cybersecurity and Network Administration
- Electrical Engineering
- Environmental Engineering
- Geological Engineering
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Mining Engineering
- Petroleum Engineering
- Occupational Safety and Health
- Software Engineering
