

OCCUPATIONAL SAFETY & HEALTH

SCHOOL OF MINES AND ENGINEERING

OCCUPATIONAL SAFETY & HEALTH AT MONTANA TECH

Montana Tech Occupational Safety and Health (OSH) graduates apply science, engineering, and technology to anticipate, recognize, evaluate, and control safety and health hazards in the workplace. From protecting people from acute injury or death due to traumatic accidents to preventing illness and chronic disease due to biological, chemical, and physical agents, our alumni are the experts in ensuring that everyone has access to a safe and healthy work environment. Our alumni are employed as Environmental Health and Safety Specialists, Safety Engineers, and Safety Managers. Our alumni join a rapidly growing and in-demand group of dedicated professionals protecting our workers and their families. Students who enjoy the sciences, conducting fieldwork in interesting environments, and frequent interactions with diverse groups of people should consider the rewarding field of Occupational Safety and Health.
