

MONTANA TECH UNDERGRADUATE RESEARCH PROGRAM

APPENDIX C
Safety Requirements

Any applicants with projects involving environmental, health or safety issues, such as:

- the use of hazardous materials, including nanomaterials
- use of hazardous machinery or equipment
- potential exposure to disease-carrying animals
- any other activities that might represent a risk to life or safety, including field work

will be required to obtain Environmental Health and Safety (EHS) office approval. All successful applicants whose project involves any of the safety issues listed above **must attend Safety Training** provided either by EHS or by the mentor. EHS is located in CBB 003 or can be reached at 406-496-4463.

Each mentor is required to submit the checklist below, to indicate if safety training is required for the project and who will provide the training. **The training must be completed prior to students working in the lab, shop or in the field and is for the student's protection.** ALL training must be documented and submitted to the Research Office. The Research Office will forward the information to the Environmental Health and Safety office.

Training Checklist

Student: _____
(Printed Name and Signature)

Student: _____
(Printed Name and Signature)

Date of training: _____

Topics Covered: _____

Training provided by: _____
(Printed Name and Signature)

- I certify that the project outlined in this application does not involve any safety, health or environmental concerns and is exempt from safety training.
- I certify that the project outlined in this application will require safety training that will be provided by the **mentor**. All documentation for this training will be submitted to the Research Office as soon as it is completed. I understand that the student(s) will not be allowed to begin their project until this training requirement is met. I will document and submit the following information to Research Office:
- I certify that the project outlined in this application will require safety training and am requesting the training be provided by the Environmental Health and Safety Office. I understand that the student(s) will not be allowed to begin their project until this training is complete, and that I will be notified when the safety training requirement has been met.
